

Industrial Gigabit 10-Port PoE+ Unmanaged Switch with 10G SFP+ Slots (24-55VDC)

New Taipei City, Taiwan – June 5, 2017 – Antaira Technologies is a global leading developer and manufacturer of industrial networking devices and communication solutions for harsh environment applications and is proud to announce the expansion of its industrial networking infrastructure family with the introduction of the **LNP-1002G-10G-SFP-24**.

The **LNP-1002G-10G-SFP-24** is industrial-grade equipment that is Ethernet ready to fulfill various markets' edge-level networking applications in harsh and outdoor environments, such as, manufacturing automation, security surveillance, power/utility, water wastewater treatment plants, oil/gas/mining, and transportation. This device supports high-density Ethernet port connectivity, 10G fiber backbone, long-distance data transmission, and has a superb reliability factor.

Antaira's **LNP-1002G-10G-SFP-24** is the latest industrial Gigabit PoE+ unmanaged Ethernet switch series that offers high-density for eight full gigabit Ethernet ports with PSE: 30W per port and two 10G SFP+ fiber slots for long-distance connectivity. This product series has an IP30 rated metal casing design that has DIN-Rail or wall mounting support. The device provides a dual redundant power input range of 24 to 55VDC with an overload current and reverse polarity prevention, as well as high EFT (2,000VDC) surge protection and ESD (6,000VDC) protection. Additionally, there is a built-in relay warning function to alert maintainers when power failures occur. Each unit is built to withstand industrial networking hazards like shock, drop, vibration, electromagnetic interference (EMI), and temperature extremes (-40° ~ 60°C). The units conform to the following dimensions of 54mm (W) x 99mm (D) x 142mm (H) and a unit weight of 3.0 pounds.

For more details about Antaira Technologies' industrial Gigabit unmanaged switches, please feel free to visit www.antaira.com.tw; or contact Antaira Technologies at +886-2-2218-9733.

About Antaira Technologies

Antaira Technologies is a global leading developer and supplier that provides high-quality industrial networking and communication product solutions. Since 2005, Antaira has offered a full spectrum of product lines that feature reliable Ethernet infrastructures, extended temperature tolerance, and rugged enclosure designs. Our product lines range from industrial Ethernet switches, industrial wireless devices, Ethernet media converters, and serial communication devices. Our vast professional experience allows us to deploy a wide array of products

worldwide in mission-critical applications across various markets, such as, automation, transportation, security, oil & gas, power/utility, and medical.
