

Model 960 Thru-Bore Absolute, 8-11 Bits

Common Applications

#Machine Tools #Robotics #Telescopes #Antennas #Rotary & X-Y Positioning Tables
#Medical Scanners

Features:

- Low Profile – 40 mm
- Thru-Bore and Blind Bore System
- Sturdy all Metal Construction
- State-of-the-Art Opto-ASIC Circuitry

The single-turn #Model 960 Absolute Series provides an unique solution to a wide variety of industrial applications requiring absolute position information. An innovative Opto-ASIC circuitry, coupled with its digital output, make it an excellent choice in those applications plagued by an unusually high level of electrical noise. By providing a low profile package of just 40mm, a variety of thru-bore and blind-bore sizes, and an easy to use flexible mounting system, the #Model 960 goes where traditional absolute encoder do not fit.
