

CAG Smart Vision

Industry 4.0 - Internet of Things - Machine Learning

- › **Eco footprint**
- › **Efficiency**
- › **Connectivity**
- › **Predictive**

Smart Application

- › QR code on all Motors
- › QR code linked to Mobile & Web Applications
- › Applications linked to Motors Specifications, Datasheets, Manuals
- › Increase in usage by Predictive and Preventative Maintenance
- › Motor information from production to usage

Smart Motor

- › Smart Accessory for Motors
- › Motor usage information
- › Predictive & Preventative Notification
- › Levels of Smart connections based on customer needs and preferences

Smart Technology

- › Decreased Environmental Impact
 - in consumption - TCO
 - materials in production
- › Increase in Power
- › Increase in Efficiency
- › Efficient Motor Technology
- › Connectivity

Smart Future

- › Decrease in Environmental Footprint
- › Decrease of Materials in Production
- › Decrease in TCO
- › Impact on life & lifestyle
- › Increase in Power
- › Increase in Efficiency
- › Connectivity across Applications
- › Remote information & notification

SMART APPLICATION

- › **Stable operation** - Preventative indicators
- › **Energy Savings** - Efficiently running operation - positive TCO
- › **Circular Economy** - Extended product lifecycle
- › **AI Data collection** - Evaluation and Central System Optimizations

For Engineer

- › Fast Motor registration by QR code
- › Interactive manuals
- › Digital Service Book
- › Maintenance Notification
- › Support Assistant
- › Maintenance history

For Manager

- › Portfolio of installed Motors
- › Life cycle of installed Motors
- › Maintenance Visits History
- › Data collection and history
- › Preventative Data Indicators

SMART APPLICATION
