

Get the Highest Video Quality Ever with OPS+ Intel® Xeon® Processor with Intel® CM236

DFI's OPS100-SH Brings Future-Proofed Flexibility and Performance to Digital Signage Market

Featuring 3 display outputs with 4K resolution @ 60Hz and fully compliance with the Open Pluggable Specification Plus (OPS+), the OPS100-SH digital signage system provides exceptional multimedia solutions to high computing intensive digital signage and white board markets. The system leverages the latest server-grade Intel® Xeon® processor with ultra-high-resolution of up to 8K video playback. The OPS100-SH has high flexibility and scalability via the OPS connectors (JAE TX25A and 2nd connector) and supports PCIe x4 signal expansion and triple displays (1 HDMI + 2 DP). The powerful OPS100-SH is able to maximize visual impacts and provide best imaging quality for digital signage solutions in retail advertising, real-time online conferences, educational lectures, and other solutions that demand high processing capabilities and audience engagement.
