

19 June 2018

New head office

## **Eisele starts operations at new administrative building and small parts warehouse**

**Seven months after the topping-out ceremony the new small parts warehouse and additional production and office space will be completed on schedule at the new location on Lise-Meitner-Straße. On 4 June the entire company moved from Ameisenbühl to the new expanded location. The automated small parts warehouse will allow Eisele to speed up internal logistics and production processes in order to ensure the fast worldwide distribution of connection components in the highly competitive market of the supplier industry.**

Two locations become one: On 4 June about half of the 160 Eisele employees have been relocated to the new head office on Lise-Meitner-Straße 8/1 in Waiblingen, which also has plenty of space for future growth. The core of the new building – the small parts warehouse with four aisles – provides space for 17,280 containers, and can be expanded for up to 26,780 containers, as needed. Five shuttles are used for filling and storing the containers. The shuttles move on rails that are mounted on the storage shelves and are raised to the respective tier by means of lifts. They can also automatically move to different aisles, for optimal utilization of the existing space.

The relocation is also accompanied by the optimisation of business processes: Eisele intends to introduce a completely paperless process, with the ultimate goal of integration in the new automated small parts warehouse. From order receipt and product planning, through production and quality control, to warehousing and dispatch: the entire exchange of information within the company will be conducted electronically with the start of operations in the new warehouse.

## ***Press Release***

### **About Eisele**

Eisele Pneumatics GmbH & Co. KG is a multinational family owned company with headquarters in Waiblingen, Germany. With 160 employees, Eisele develops, produces and distributes premium quality solid metal connectors and has become established over the past decades as a leading supplier of innovative connection solutions. The Eisele portfolio – manufactured virtually 100% in Germany – comprises all important standard connection components such as push-in fittings, quick-release couplings and tube fittings, as well as numerous innovative products with unique selling properties that set standards, such as an extensive line of multiple connectors. Worldwide distributors and the subsidiary Eisele Connectors in Michigan, USA, ensure the global availability of Eisele products.
