MID
APPROVED**

**Current Transformer for use
with AP15-P5CO available within
Class 0.2S and 0.5S accuracy**

AP15-P5CO is a high accuracy multifunction power meter that is a traditional wired 1 or 5A current transformer operated meter.

Configurable for 1p2w, and 3p4w systems and hosting a vast range of measuring parameters such as Amps, Volts, Power, Energy, and Current Demand, Power Factor, Imported and Exported kWh, Phase Sequence, replacing the need for several different models.

Features:

- MID Certified to Class C (0.5%) accuracy
- CT Operated 1 or 5A AC input
- Import / Export kWh
- Phase Summary Screen
- Self-supplying
- Configurable for 1p2w, and 3p4w systems
- Total harmonic distortion (THD) up to the 63rd harmonic
- Touch-sensitive buttons
- Backlit display
- Programmable Reverse Flow
- Built-in Modbus and Pulsed output
